

Picup System & AI - Production Deployment Guide

Architecture

Google Sites → Firebase Hosting → Firebase Authentication → Firestore → Cloud Functions → Gemini AI Engine → Driver App

Features

Training, KPI Dashboards, AI Assistant, Finance Automation, Driver Monitoring, Live Chat and SOP Uploads.

Deployment

Deploy Google Apps Script, embed in Google Sites, configure Firebase and Gemini AI.

Driver Automation

Auto-unassign drivers beyond 5km and suspend after 3 failed orders.

Monitoring

Use Google Analytics, Crashlytics and Cloud Logging.

Service	Purpose
Firebase Hosting	Frontend Hosting
Firestore	Realtime Database
Gemini AI	AI Assistant
Cloud Functions	Backend Automation
